iniyasivaraj@gmail.com | (984) 292-5147 | [linkedin.com/in/iniya-sivaraj](https://www.linkedin.com/in/iniya-sivaraj)

Data Science student at UNC Charlotte with experience in data analysis, research, dashboard development, and data and AI solutions through internships, undergraduate research, and hackathons. Skilled in Python, Excel, JavaScript, and technical documentation, with experience translating complex findings into clear, actionable recommendations. Proven ability to collaborate on AI, fintech, research, and process improvement projects in fast-paced, team-based environments.

EDUCATION

University of North Carolina at Charlotte, College of Computing and Informatics – Charlotte, NC

Bachelor of Science, Data Science | Minor in Artificial Intelligence | (Expected May 2029)

Panther Creek High School – Cary, NC

High School Diploma (June 2025)

SKILLS & ACTIVITIES

Organizations: Emerging Leaders; UNC Charlotte Global; Future Business Leaders of America (FBLA); TiE Young Entrepreneurs (TYE)

Technical Skills: Python; Excel; Data Analysis & Reporting; Data Visualization; Dashboard Design; New Relic; NRQL; Java; JavaScript; Figma; Adobe Photoshop; Adobe Illustrator

Certifications: Microsoft Excel; Adobe Certified Associate – Photoshop; Adobe Certified Associate – Illustrator

RESEARCH EXPERIENCE

Computing Research Association (CRA) UR2PhD, Undergraduate Researcher — Remote

Jun 2026 - Aug 2026

- Applied research methods and data-driven analysis to investigate computing research questions during a 10-week faculty-mentored program.
- Analyzed and interpreted research findings, collaborated with undergraduate researchers, and communicated results through technical documentation and presentations.

PROFESSIONAL EXPERIENCE

FidHacks (Fidelity Hackathon), Participant – Durham, NC

May 2026 – May 2026

- Selected as 1 of 71 participants to develop FidRISE, a fintech solution designed to improve financial confidence among first-year college women.
- Helped create a React/Vite financial literacy platform and 2036 Money Mirror simulation game with quiz-based personalization, micro habits, QR-code marketing, and AI learning support.
- Supported campaign strategy, user flow, presentation content, and student-centered outreach ideas including campus booths, social media, and interactive finance games.

ZirconTech, Computer Science Intern – Remote

Mar 2026 – May 2026

- Applied New Relic AI and agentic workflows to analyze system incidents, reduce alert noise, and improve root-cause identification.
- Built a demo-ready system showcasing end-to-end observability using metrics, logs, and distributed traces.
- Developed use cases connecting observability and AI to business outcomes such as reduced MTTR and improved system reliability.

The Hartford, Freshman Experience Program, Participant – Charlotte, NC

Jan 2026 - Jan 2026

- Collaborated with cross-functional teams to understand business workflows and corporate operations.
- Practiced documenting insights and communicating findings from case scenarios and industry exercises.
- Strengthened professional communication, stakeholder engagement, and internship readiness skills.

PROJECTS

Census Data Analysis | Python, Census API, Pandas

- Retrieved 2024 American Community Survey data using the U.S. Census API and Python.
- Selected and analyzed demographic variables including population, age, income, housing, and transportation.
- Processed API responses into structured datasets for analysis and visualization.

LEADERSHIP EXPERIENCE

UNC Charlotte Global – Office of Intercultural and Educational Experiences, Program Assistant — Charlotte, NC

Feb 2026 – Mar 2026

- Organized and tracked program schedules, participant information, and activity logistics to support efficient day-to-day operations.
- Maintained accurate program information and communicated updates between students and professional staff to support timely decisions.
- Identified participant needs and organized relevant information to improve coordination, problem-solving, and overall program delivery.
